### **WHAT IS AN IPR?**

Intellectual Property Rights are legal rights, which result from intellectual activity in industrial, scientific, literary & artistic fields. These rights Safeguard creators and other producers of intellectual goods & services by granting them certain time-limited rights to control their use. Protected IP rights like other property can be a matter of trade, which can be owned, sold or bought. These are intangible and non exhausted consumption.

### **Theme of the workshop:**

The workshop on "Role of Intellectual Property Rights ", is well structured and covers various aspects on Intellectual Property Rights (IPRs) that are concerned with the protection of tangible and intangible property. It provides rewards and recognition to inventor/contributor for their research, designs, discoveries, inventions, etc.

The main aim of workshop is to impart greater awareness about the issue of IPRs, which gained a special importance for all the domains of socio-economic development.

### **Target Audience**

Faculties, Industry personnel, Scientists, Research scholars who are into research and want to know more about IPRs, Patents, Commercialization of technologies, Technology transfer procedures, Startup and Entrepreneurship echo system.

### **Topics to be covered in workshop**

1. Overview of IP and patent system and Integrating IP tool for R&D
  2. Patent Information and Disclosure of Invention for Patentability Due diligence
  3. Drafting Patent and its Prosecution in India and Abroad
  4. IP Issues in Digital Technology and Copyright in Protection and Registration
  5. IP Issues in Technology Transfer, Industry-Academic Collaboration
- Promoting Start-ups and Entrepreneurship Initiative and Ecosystem

### **WHAT IS RESEARCH METHODOLOGY?**

Research methodology is the specific procedures or techniques used to identify, select, process, and analyze information about a topic. In a research paper, the methodology section allows the reader to critically evaluate a study's overall validity and reliability.

Types of research methods include the following:  
Basic research: A basic research definition is data collected to enhance knowledge. ... Applied research: Applied research focuses on analyzing and solving real-life problems. This type refers to the study that helps solve practical problems using scientific methods.

### **Theme of the workshop:**

In the present scenario, where rapid advancements are taking place in every field of science and technology, a thorough understanding of research methodology has become essential to teachers and research scholars to pursue further innovations in their respective fields of specialization. Thus, it is strongly believed that, research and development having become an essential component, not only in academic institutions but in industries as well, a Workshopon research methodology would be valuable.

### **Target Audience**

Faculties, Industry personnel, Scientists, Research scholars who are into research and want to know more about IPRs, Patents, Commercialization of technologies, Technology transfer procedures, Startup and Entrepreneurship echo system.

### **Topics to be covered in workshop**

- 1.Awareness of thrust areas, fertile for identifying a research problem, that will lead to further productive outcomes, further stages of research
- 2.Literature review, concerned data collection, mathematical propositions, simulation studies,
- 3.Use of relevant software tools, adoption of appropriate algorithms
- 4.Experimentation or statistical analysis and other appropriate illustrative components
- 5.Presenting the overall methodology and conclusions convincingly
- 6.Report writing, elaborating the overall sequence adopted and the conclusions
