ACT NOW. GIFT LIFE.

DATRI Blood Stem Cell Donors Registry is a not for profit organisation, founded in 2009, to help save lives of people affected by fatal blood disorders, by providing them an opportunity to find a HLA matched voluntary donor.

Patients with blood disorders like Leukemia, Lymphoma, Thalassemia can be cured through a blood stem cell transplant from a HLA matched donor. Since there is only 25% chance of finding a match from within the family, many of them have to depend on unrelated donors from registries like DATRI.
