Report on Technical Talk on “5G Technologies”

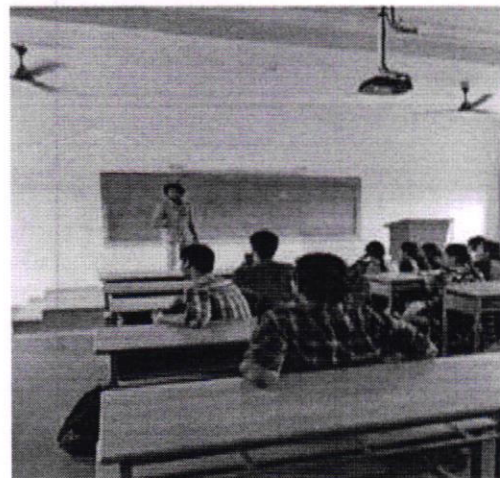

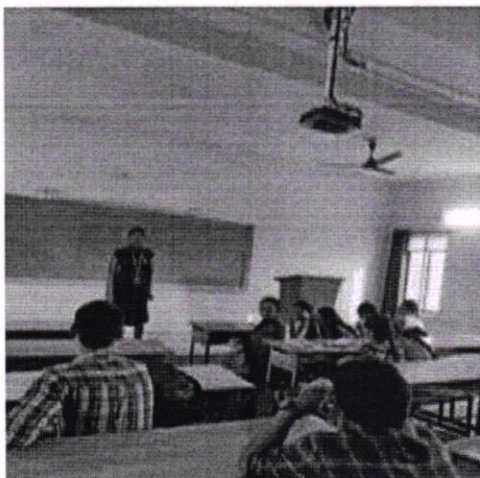

The department of ECE has Conducted “Technical talk on 5G Technologies” on behalf of student’s association “ELVITSSA” to III-Year ECE students on 13.03.2023. Tech Talk gives learners the functional language they need for real-life, hands-on tasks in the technical, industrial, and scientific sectors.

In mobile communication, we have seen various fast evolutions from first generation (1G) to fourth generation (4G) with significant updates in their performance. Similarly, at present, fifth-generation (5G) technology is developed after 1G, 2G, 3G & 4G networks which is a new global wireless standard. This technology simply allows a new type of network that is mainly designed for connecting almost everyone & everything together like devices, objects and machines. 5G wireless network technology delivers very low latency, high multi-Gbps peak data speeds, additional reliability, huge network capacity, improved availability & more uniform experience for users.

Mr. V Narayana Reddy, Asst.Prof, Dept. of ECE and Mr. G Manga Rao, Asst. Prof, Dept. of ECE judged the event.

Report on Group Discussion

Topic: “Chandrayaan 2 a failed machine mission or a step-in stone for future glory”

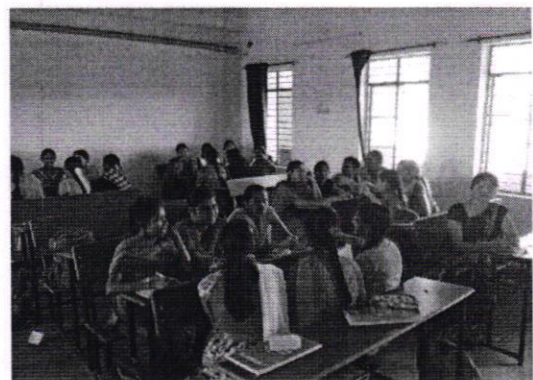

The department of ECE has Conducted “**Group Discussion**” on behalf of student’s association “ELVITSSA” to IV ECE students on 22.02.2023. Group Discussion is a systematic and purposeful interactive oral process. The exchange of ideas takes place in a systematic and structured way through oral communication. GD skills may ensure academic success and good job offer. Thus, it is important to be able to take part in a GD effectively and confidently.

India’s ambitious attempt to land on the unexplored polar south of the moon has ended in disaster. With less than two miles to a place in history, Vikram lander (named after Vikram Sarabhai, who cradled the Indian Space sciences in their infancy) landed beyond ISRO’s reach, a live broadcast. It was set to countdown to this new milestone, showed tensed scientists attempting to retain control, but all signals were eventually lost.

Ms. M Pavitra, Asst.Prof, Dept. of ECE and Mr. P Venkateswarlu, Asst. Prof, Dept. of ECE judged the event.

Report on Technical Quiz on "Advancements in TV Broad Casting"

The department of ECE has Conducted **Technical Quiz on "Advancements in TV Broad Casting"** on behalf of student's association "ELVITSSA" on 16.02.2023. As part of student Association Activities, "**Quiz**", has been conducted for II-Year students.

QUIZ plays a predominant role in this modern world. To reinvent the education system and give students a break from traditional classroom learning, there is a dire need to revive the quiz culture in schools and colleges. And technology can act as a facilitator by bringing innovation to quizzes and ensuring active participation among students. Besides the obvious academic benefits of expanding a student's knowledge and exploring new skills at an early age, quizzes redefine the education system in significant ways.

There were two rounds in the quiz competition. The first round was multiple choice questions written test. Out of 52 participants, 26 teams participated and 10 teams were selected for the second round. The students have effectively enhanced the relevant knowledge through the quiz competition.

Dr. V Prakasam, Professor, Dept. of ECE and Mr. K Penchalaiah, Asst. Prof, Dept. of ECE judged the event.

Technical Quiz Written Examination

Date: 16.02.2023

Student Names:

Roll Nos:

1. Which number system has a base 16 []
a) Hexadecimal b) Octal c) Binary d) Decimal
2. What will be the value of the following Python expression? $4 + 3 \% 5$ []
a) 7 b) 2 c) 4 d) 9
3. Which of the following is used to define a block of code in Python language? []
a) Indentation b) Key c) Brackets d) All of the mentioned
4. A continuous-time periodic signal $x(t)$, having a period T , is convolved with itself. Then the resulting signal is _____ []
a) Not Periodic b) Periodic having a period $2T$
c) Periodic having a period T d) Periodic having a period $T/2$
5. The type of systems which are characterized by input and the output quantized at certain levels are called as _____ []
a. analog b. discrete c. continuous d. digital
6. The type of systems which are characterized by input and the output capable of taking any value in a particular set of values are called as _____ []
a. analog b. discrete c. digital d. continuous
7. A dice is thrown, what is the probability of getting multiples of 3? []
a) $1/8$ b) $1/6$ c) $1/2$ d) $1/3$
8. If two dice are simultaneously rolled then what is probability of getting sum 11? []
a) $1/6$ b) $1/4$ c) $1/9$ d) $1/18$
9. A coin is tossed and a dice is rolled simultaneously what is total number of possible outcomes? []
a) 2 b) 6 c) 12 d) 24
10. Basically, the flux lines which are represented by the lines of force are regarded as _____ []
a) Branch lines b) Node lines c) Stream lines d) Loop lines
11. Which form of Gauss's law is regarded as Maxwell's first equation? []
a) Point form b) Line form c) Angular form d) Exponential form
12. Under which category of charge distribution does the cathode ray tube belong to?
a) Point form b) Line form c) Angular form d) Volume Charge
13. Which property does $y(t)=x(1-t)$ exhibit? []
a) Time scaling b) Time shifting c) Reflecting d) Time shifting and reflecting
14. What are the important block(s) required to process an input analog signal to get an output analog signal? []
a) A/D converter b) Digital signal processor
c) D/A converter d) All of the mentioned
15. How many bits are needed to store one BCD digit? []
a) 2 bits b) 4 bits c) 3 bits d) 1 bits
16. The process of assigning standard level to DT sample is known as _____ []
a) quantization b) coding c) sampling d) digitizing
17. In A SCR (Silicon Controlled Rectifier) is a device with _____ []
a) 3 junctions b) 2 junctions c) 1 junctions d) 4 junctions
18. _____ is defined as any physical quantity that varies with time, space or any other independent variable. []
19. A discrete signal is said to be even or symmetric if $x(-n)$ is equal to _____ and a discrete signal is said to be odd or asymmetric if $x(-n)$ is equal to _____
20. Damped sinusoids are _____

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

Report on Mini Project Exhibition

The department of ECE, as a part of student association activities on the eve of Dr A P J Abdul Kalam's Birthday, has organized mini project expo on 15.10.2022 to exhibit the mini projects done by the students.

Avul Pakir Jainulabdeen Abdul Kalam BR (15 October 1931 – 27 July 2015) was an Indian aerospace scientist and statesman who served as the 11th president of India from 2002 to 2007. He was born and raised in Rameswaram, Tamil Nadu and studied physics and aerospace engineering. He spent the next four decades as a scientist and science administrator, mainly at the Defence Research and Development Organization (DRDO) and Indian Space Research Organization (ISRO) and was intimately involved in India's civilian space programme and military missile development efforts. He thus came to be known as the Missile Man of India for his work on the development of ballistic missile and launch vehicle technology. He also played a pivotal organizational, technical, and political role in India's Pokhran-II nuclear tests in 1998, the first since the original nuclear test by India in 1974.

The main objective of organizing this exhibition is to provide the platform and unleash the potential of the students by showcasing their innovative projects and provide an opportunity for the students to demonstrate their learning experience. The students showed good enthusiasm to display their projects. There are 14 batches actively participated in this event.

Dr. M. Venkatesan, Professor, Dept. of ECE and Mr. R. Pratap Singh, Asst. Professor, Dept. of ECE judged the event.

Mini Project Abstract

Sun Tracking System Using Arduino

As the non-renewable energy resources are decreasing use of renewable resources for producing electricity is increasing. Solar panels are becoming more popular day by day. Sun Tracking System is a hybrid hardware/software prototype, which automatically provides best alignment of solar panel with the sun, to get maximum output. A single tracking system was used. It is cheaper, less complex and still achieves the required efficiency. In terms of costs and whether or not the system is supposed to be implemented by those that use solar panels, the system is viable. The increase in power is considerable and therefore small increase in cost. Maintenance costs are not likely to be high. A C program loaded into the Atmega forms the embedded software. There is a metallic frame that houses the components. The three stages are designed independently before being joined into one system. This approach, similar to stepwise refinement in modular programming, has been employed as it ensures an accurate and logical approach which is straightforward and easy to understand. This also ensures that if there are any errors, they are independently considered and corrected.

Mini Project Abstract

Voice Controlled Wheelchair Using Arduino and Bluetooth

This project describes the design of a smart, motorized, voice-controlled wheelchair. This project represents the “Voice-controlled Wheel chair” for the physically disabled person where the voice command controls the movements of the wheelchair. The voice command is given through a cellular device having Bluetooth and the command is transferred and converted to string by the BT Voice Control for Arduino and is transferred to the Bluetooth Module HC05 connected to the Arduino board for the control of the Wheelchair. For example, when the user says “forward” then chair will move in forward direction and when he says “Back” then the chair will move in backward direction and Similarly “Left”&“Right” for rotating chair in left and right directions respectively and “Stop” for making it stop. This system was designed and developed to save cost, time and energy of the patient. The circuit comprises of an Arduino and Bluetooth module and Motors. The Bluetooth module recognizes the voice command by using IOT boys app. Then the Arduino process the corresponding data, and by using motor driver, the motors rotate locomotively.

Mini Project Abstract

Alcohol Sensing and Engine Locking System

This represents our project in which we try to tackle the problem of loss of life and property due to drunken driving. In our project, we have used ArduinoUno3 microcontroller attached to an alcohol sensor which detects the presence of alcohol by analyzing breath of a person driving the vehicle. Engine of the vehicle is turned off and the emergency siren is blown as soon as alcohol is detected, thereby minimizing the chances of any mishaps that could have happened. Therefore, loss of life and property is avoided.

Report on Engineers Day Celebration

The department of ECE has Conducted “**Engineers Day Celebration**” on behalf of student’s association “ELVITSSA” to II, III & IV ECE students on 15.09.2022.

National Engineer’s Day is observed every year on September 15 on the birth anniversary of the legendary engineer Mokshagundam Visvesvaraya. The day is observed every year to pay tribute to Visvesvaraya and also to commemorate the contributions of the engineers to the nation. The Bharat Ratna awardee, Visvesvaraya was born on September 15, 1861 in a village called Muddenahalli in Karnataka. A Bharat Ratna awardee, Visvesvaraya had studied Bachelor of Arts (BA) from the University of Madras and pursued civil engineering at College of Science in Pune. He later patented and installed an irrigation system with water floodgates at the Khadakvasla reservoir near Pune to raise the food supply level and storage to the highest levels. This was also installed at Gwalior’s Tigra Dam and Mysuru’s KrishnarajaSagara (KRS) dam, the latter of which created one of the largest reservoirs in Asia at the time. While serving as the Diwan of Mysore, he was awarded ‘Knight’ in 1915 as a commander of the British Indian Empire by King George V. He received the Bharat Ratna in 1955, became a member of the London Institution of Civil Engineers before he was awarded a fellowship by the Indian Institute of Science (IISC) Bangalore. The eminent engineer, Mokshagundam Visvesvaraya passed away in 1962. To remember the birth anniversary of him, one of the great legends and engineer himself, Sir Mokshagundam Visvesvaraya, we also join hands together in the merriment.

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

Report on JAM session on occasion of "Teachers Day"

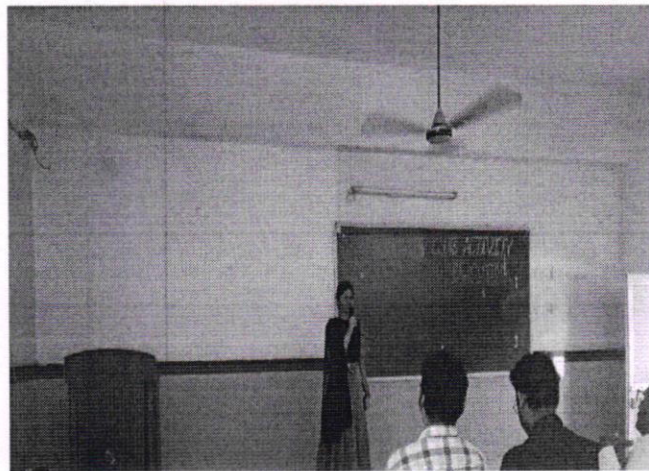

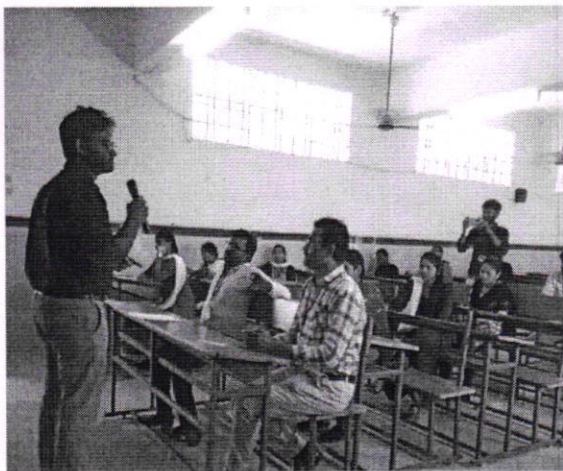

AspartofStudentAssociationActivities, on the occasion of Teachers Day Celebration **JustaMinute**competitionisconductedforII, III& IV ECE on 05-09-2022 toencouragestudentstogaincommunicationandinteractiveskillsapartofsubject knowledge.

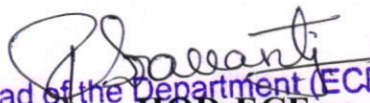

Just A Minute (JAM) Sessions are one-minute impromptu speeches. Here, the speaker is presented with a topic on the podium and is given 10-30 seconds to think about it and assimilate all their ideas. After the thinking period is over, the individual is given a minute to express their views on that particular topic. It might seem like something easy and fluent, but what makes it difficult is nervousness, fear of failure, the strangers sitting in front of you, the evaluation process, limited knowledge, the inability to think on your feet, filler words, and the long pauses. There are 34 students actively participated in JAM session.

Mr. V Bharath Kumar,Asst. Prof Dept. of ECE and Mrs.K S Bhanu Rekha, Asst. Professor judged the event.
